Notes to be used in scoring ERS:

- For scoring the 3rd editions of the scales, it is likely that only one meal or snack will be observed. It will not be possible to ensure all requirements are met, so base score on whatever is observed.
- All amounts are the minimum portions to be served, not the maximum
- Breastmilk or formula or both must be served
- Infant formula or dry cereal must be iron-fortified
- Fruit and vegetable juices must not be served
- A serving of grains must be whole-grain rich, enriched meal, or enriched flour
- Yogurt must contain no more than 23 grams of sugar in 6 oz.; breakfast cereals no more than 6 grams sugar per oz.
- Infants must be developmentally ready to be served solid foods or foods that must be gummed or chewed
